

***Adisianus* nom.nov. for a genus of Symphypleona (Insecta,
Collembola) from Central Amazonia, Brazil**

by

G. Bretfeld

Dr. Gerhard Bretfeld, Zoologisches Institut der Universität, Olshausenstr. 40, D-24098
Kiel, Germany; e-mail: gbretfeld@zoologie.uni-kiel.de
(Accepted for publication: October, 2003).

Abstract

For *Adisius* BRETFFELD, 2002, which is a homonym, a new name is proposed. In addition, three errata in BRETFFELD (2002) are mentioned.

Keyword: **Collembola, Symphypleona, *Adisius*, *Adisianus*, homonym.**

Resumo

Para *Adisius* BRETFFELD, 2002, que representa um homônimo, propos-se um novo nome. Adicionalmente indica-se três erros em BRETFFELD (2002).

The generic name *Adisius* BRETFFELD, 2002 is a junior primary homonym of *Adisius* FAIRMAIRE, 1903. Therefore, instead of *Adisius*, I propose the name *Adisianus* nom.nov., type species *Adisius maculatus* BRETFFELD, 2002.

The diagnosis is the same as in the original description. The gender of the new name is masculine.

This new name is also dedicated to Prof. Dr. Joachim ADIS, Plön/Germany.

In addition, three errata in BRETFFELD (2002) are mentioned:

-1) In Table 1, p. 127, the numbers of Figs. 25 and 55 have to be mutually changed.

-2) The complete legends of Table 1, p. 127, read:

Fig. 1: *Adisius maculatus* n.g. n.sp.; male colour pattern, length without furca 0.5 mm.

Fig. 18: *Adisius fuscus* n.g. n.sp.; male colour pattern, length without furca 0.55 mm.

Fig. 25 (erroneously called Fig. 55): *Arborianna cupiubae* n.g. n.sp.; male colour pattern, length without furca 0.5 mm.

Fig. 55 (erroneously called Fig. 25): *Sphyrotheca caputalba* n.sp.; female colour pattern, length without furca 0.6 mm.

Fig. 68: *Sphyrotheca coeruleocapitata* n.sp.; male colour pattern, length without furca 0.6 mm.

-3) In Fig. 26, p. 131, the markings of the setal rows 'a' and 'b' of head frons have to be mutually changed ('a' is the outer row, 'b' the inner).

Acknowledgments

I would like to thank the staff of the Zoological Record, especially John K. Page, York, England, who found the homonymy, and Jeremy D.D. Smith, British Museum (Natural History), London, who checked the generic lists for the new name. I also thank G. Pietzonka, Senckenbergische Bibliothek, Frankfurt/Main, Germany, who gave me the reference of Fairmaire's paper.
